**HomePNA Showcases Member Technology at TelcoTV 2008**

**San Ramon, CA – November X, 2008** – The HomePNA Alliance, a leader in technology for networking IPTV over the existing coax and phone wires in the home, today announced that it will be exhibiting at the TelcoTV 2008 show being held in Anaheim, Calif., at the Anaheim Convention Center, Nov. 11-13. “I’m looking forward to attending TelcoTV, one of the leading events for telcos looking to deploy triple-play services,” said recently elected HomePNA president William Simmelink. “We’ve made tremendous inroads in North America and, with AT&T U-verse TV close to the 1 million subscriber mark and many other leading telcos installing HomePNA, interest continues to grow rapidly.”

Simmelink, president of HomePNA promoter company CopperGate Communications, has been a member of the HomePNA board of directors since 2006. Before CopperGate, Simmelink was general manager of the packet voice and video business at Texas Instruments and vice president of business development at Telogy Networks, one of the industry’s pioneers and strongest players in Voice-over-IP, acquired by Texas Instruments in 1999.

**About HomePNA**

HomePNA is an incorporated, non-profit association of industry-leading companies working together to create, promote and certify multimedia home networking technology that operates over existing wires. HomePNA technology operates over coax cables and phone wires to deliver Internet Protocol (IP) services like IPTV, Voice over Internet Protocol (VoIP) and data, often

bundled by service providers as triple-play services. Founded in June 1998, HomePNA members represent cutting-edge international companies that span the networking, telecommunications, hardware, software and consumer electronics industries. For more information on HomePNA, visit [www.homepna.org](http://www.homepna.org) and visit the HomePNA blog at <http://homepnablog.typepad.com/>.
